

General Provider Communication

Maricopa County Regional Behavioral Health Authority
Magellan Health Services of Arizona, Inc.

Dear Provider,

Magellan of Arizona would like to remind you that the scheduled implementation update to the Demographic is fast approaching. The update is scheduled to occur Monday, Jan. 25, 2010. To ensure you are prepared for the update, Magellan would like to encourage all providers to test their EDI processes.

Until now many providers have not tested their EDI processes. **Magellan would like to stress that testing your EDI processes prior the implementation on Monday, Jan. 25, 2010, is important to ensuring you are prepared to support the update.** If you have questions about testing or the scheduled update, please don't hesitate to e-mail us at MaricopaEnrollmentSupport@MagellanHealth.com. We are here to answer your questions and support you in testing your EDI process. It is important to us that each and every provider has the opportunity to run a test prior to the implementation.

Thank you for your cooperation.
