

**Magellan of Arizona/Maricopa RBHA
 QI Committee Meeting Summary**

Meeting Name: Quality Improvement Committee
Meeting Date: 10/16/07

Key Topics	Decisions/Outcomes
Quorum, Welcome & Introductions	<p>The meeting was initiated by welcoming the Committee Attendees and introductions followed.</p> <p>The Committee reviewed and accepted the Minutes as there were no objections noted.</p>
SMI Mortality Rate	<p>The committee reviewed the SMI Mortality Rate Reports for the Committee. In summary, mortality rate per 1000 enrolled members reports annual rates, quarterly rates, and monthly rates. Data is collected and compared to ADHS web statistics published, including County, State, National and previous vendor. Our rate was much higher in the month of September 2007 and projected to be much higher if trends hold up. Suggestions noted for future analysis: parallel efforts with a Provider to enhance report analysis, develop tracking system to conduct mini studies including ER stats, deaths, PCP coordination efforts and key components to interventions will be reviewed again to evaluate rates compared to projections.</p>
MCE Study Topics	<p>There was a recommendation that QIC review and endorses Study Topics. This study includes various Providers, title of studied areas/effects of family involvement, and rationale to evaluate effectiveness, involvement and focus of study. This study includes partial quarter report; next report is due January 2008 and more information will be available by then. This study will be revisited in six months and incorporate SMI Population and other vital factors.</p>
